PROFILE

Full-Stack Engineer with 10+ years of experience building scalable, data-driven web applications and intelligent user interfaces. Recently focused on AI-powered application development, including custom Chrome extensions and CRM tools for small businesses using LLMs and automation APIs. Skilled in Python, JavaScript, and Ruby, with hands-on expertise in LLM integration, data modeling, and intelligent UX design. Adept at taking ideas from prototype to production, optimizing workflows, and mentoring junior developers in maintainable coding practices.

Freelance Fullstack Developer - Remote — Aug 2025 - Present

- Designed and developed AI-integrated Chrome extensions leveraging OpenAI APIs for real-time text analysis, data extraction, and automation.
- Built a lightweight CRM platform for small businesses featuring automated lead capture, intelligent email generation, and workflow insights using Ruby on Rails and LLM backends.
- Collaborated with clients to define and execute AI-driven business logic, integrating natural language interfaces, REST APIs, and data visualization tools.
- Deployed applications on cloud platforms (Heroku, Google Cloud) with long-term scalability and maintainability in mind.

UX Designer — Harmonia — Aug 2025 - Present

- Design intuitive, user-centered interfaces by translating user needs, research insights, and business requirements into clear interaction flows and visual designs.
- Conduct and synthesize user research (interviews, usability testing, analytics) to inform design decisions and validate solutions.
- Create and maintain design artifacts such as wireframes, prototypes, user journeys, and design systems to ensure consistency and scalability.
- Collaborate cross-functionally with product managers, engineers, and stakeholders to iterate on designs and deliver high-quality user experiences.

Web Application Engineer — Turnstyle(Lifeblue); Plano, TX — Mar 2024 - Nov 2024

- Developed key features for a full-function stadium seat selection application for MLB using Vue.js, optimizing data management and performance.
- Customized websites to meet branding and business needs for onboarding clients, ensuring a smooth transition and user satisfaction.
- Enhanced and maintained the Turnstyle product, focusing on scalability and seamless UX.

UI/UX Developer — Highland Homes; Plano, TX — July 2019 - Mar 2024

- Designed and built data-driven SPAs with Vue.js, tailored for mobile and 50" touchscreen kiosks, accommodating diverse user requirements.
- Implemented a robust floor plan viewer for property visualization and improved usability.
- Built and maintained a proprietary mobile app with NativeScript-Vue, handling complex data requirements.

- Created mockups for new applications using Adobe XD, ensuring responsive and accessible design.

Web Developer — Boomer Benefits; Fort Worth, TX — Jun 2018 - Jul 2019

- Updated and maintained WordPress sites, ensuring security and performance.
- Created custom Wordpress plugins and web apps.
- Performed split testing to determine most performant layouts/forms.
